

The Food Chemistry Division of the  
Royal Flemish Chemical Society (KVCV-  
Voeding) presents a workshop on

## Development, implementation and follow-up of a GLP quality system

2-4 October 2017, Ghent (Belgium)

*It is important that the actors (sponsors, management, study directors, study personnel, quality assurance staff and archivists) involved in the development, implementation and follow-up of a GOOD LABORATORY PRACTICE (GLP) quality system understand and interpret correctly the content of the principles of GLP before they produce reliable data that complies with regulatory agencies' good laboratory practice guidelines, specifications, and regulations. The application of the principles of GLP is mandatory. The programme of this GLP training workshop includes presentations, discussions, individual exercises and group problem-solving case studies to assure the actors to apply the Principles of GLP correctly in order to be GLP certified and to submit data for scientific evaluation by regulatory authorities.*

### Programme
